

Please do not do anything that would disrupt my being able to hear K-Love radio. It is the only radio station that I listen to as many as many of my local friends. It is a station that I can recommend to anyone, without worry about the content that their children will hear. We have enough radio stations that have trash on them, and this is the only one I know of that is safe for all ages to hear. As the director of a pregnancy care center, I'm aware of many families with very limited financial means. Without being able to hear K-Love free they would not have the resources to buy CD's and tapes to replace the good quality music that would be lost if K-Love goes off the air in our area. All that's played on K-Love is positive and encouraging music-how can that not be in the public's best interest instead of people hearing songs prompting rape and murder.
